Project
Interactive billing application

About

- Command line application to track bills / expenditures
  - Add, edit, view, remove
- Purposefully simple
  - Focus on working with Rust:
    - enums, Option, Result, match, iterators, etc
    - Ownership / Borrowing issues
    - Mutability
- Objectives:
  - Implement previously covered materials in a larger context
    - Solidify concepts before moving to more advanced material

Sample

```
== Manage Bills ==
1. Add bill
2. View bills
3. Remove bill
4. Update bill
5. Bill total

Enter selection:
```
